

A**B****C**

**0 missing entries
in all 21 features**

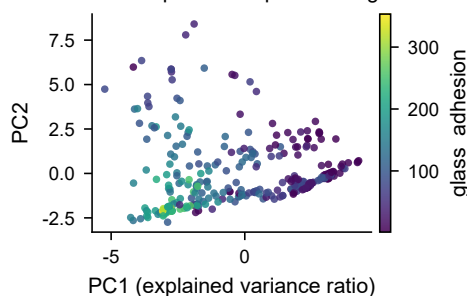

no imputation needed
(max missing = 0.0000%)

D

Feature-feature correlation (k=21)

**E**

PCA: composition separates target

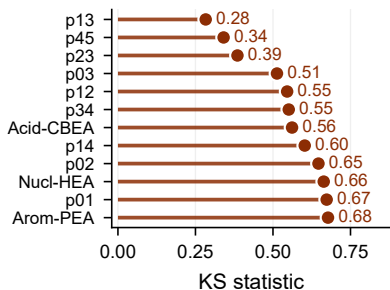

**F**

**single experimental
condition**

1 condition, 316 formulations
→ no batch effect to confound

G

Internal vs external shift (top 12)

**H**

**316 groups
of size 1**

grouped CV →
leave-one-formulation-out

I

Internal vs external: target range overlap
